

R eq ID	Type	Description	Priority	Acceptance Criteria	Rationale
FR-001	Functional	The system shall allow the customer to choose a coffee from the available options.	High	When the customer selects coffee, the available coffee options are displayed for selection.	This is the first and most important step in placing an order.
FR-002	Functional	The system shall allow the customer to choose the size of the coffee.	High	When the customer selects a size, the selected size is shown and the system moves to the next step.	The size is needed to complete the order and calculate the price.
FR-003	Functional	The system shall allow the customer to add optional items such as an extra shot, milk, or syrup.	Medium	When the customer selects an add-on, it is added to the current order.	Allows customers to customize their coffee according to their preference.
FR-004	Functional	The system shall allow the customer to pay using a credit/debit card or mobile wallet.	High	When the customer reaches the payment stage, the available payment options are displayed.	Payment is necessary to complete the order.
FR-005	Functional	The system shall provide a receipt containing the order details and loyalty points after payment.	High	After successful payment, the system prints a receipt showing the order details and loyalty points.	Gives the customer confirmation of the purchase and their loyalty points.
NFR-001	Nonfunctional	The system shall allow the customer to complete an order from selection to payment within 60 seconds.	High	The time taken from starting the order to completing payment is less than 60 seconds.	Helps the kiosk serve customers quickly, especially during busy hours.
NFR-002	Nonfunctional	The system shall provide a simple and responsive interface.	High	After the customer selects a button or option, the system responds within 2 seconds.	Makes the kiosk easy and quick for customers to use.
